

# Transfr Career Exploration

## Helping Tomorrow's Workforce Find Career Pathways.

Transfr helps you increase interest and enrollment in CTE pathways through immersive, VR experiences.

Students are able to explore a day in the life of workers in well-paying occupations in high-growth industries and discover new career possibilities that they may have never even known existed.

SHORT, ENGAGING SIMULATIONS

DAY-IN-THE-LIFE EXPERIENCES

CLOSED CAPTIONING

DATA TRACKING AND DASHBOARDS

### Help Learners...

1

#### Discover New Careers

Find and explore occupations with our VR menu.

#### Experience New Skills

Try a day in the life of a worker in each career by accomplishing a task in under 5 minutes.

2

3

#### Track Interest

A robust dashboard allows educators to understand learner progress, while a rating system helps guide learners to skill aptitude.

#### Informed Career Selection

Allow learners to make informed career decisions based on both skills and aptitude.

4

### Students love exploring careers in VR.

Students can't choose a career that they know nothing about. Transfr gives them experiences that will help them choose a path. Transfr helps students understand industries and see the value in a broad range of careers.

- Sarah Jane Walker, CTE Counselor, Tyler ISD

# What's New in 2024?

## Spanish Support! New Occupations!

Career Exploration now includes five new career clusters and 14 simulations in Spanish to enable more learners to get on a path to upward mobility and a high-paying career.

Now, schools and English Language Learner (ELL) programs in every state can provide interactive VR experiences in Spanish that transport learners directly into a virtual workspace where they can explore careers, practice skills, develop competencies, and experience simulated outcomes in a safe and supportive environment.
